

CELLOTION®

Cell wash and recovery solution for cells and tissues

- Ready-to-Use
- Serum-Free
- Protein-Free
- JP/USP Highest Quality Components
- pH, Osmolarity, Sterility,
Mycoplasma, Endotoxin and Cell-
Based Release Testing

CELLOTION is a chemically defined cell wash solution that improves cell recovery yields. It can be used as an alternative to saline or buffer during cell collection and its unique formulation, which contains no serum, proteins or sugars, allows cells and tissues to be washed.

Usage

When collecting cells, by pre-treating the cells, containers and tubes with CELLOTION, it is possible to inhibit cell adherence to the inner wall and improve the cell recovery rate.

CELLOTION products ship at ambient temperature.
Upon receipt, store at 2 - 8°C until ready to use.

Test items and the standards are provided on all lot
specific Certificates of Analysis (CoA) .

Further protocol support is available at
